Bluewater

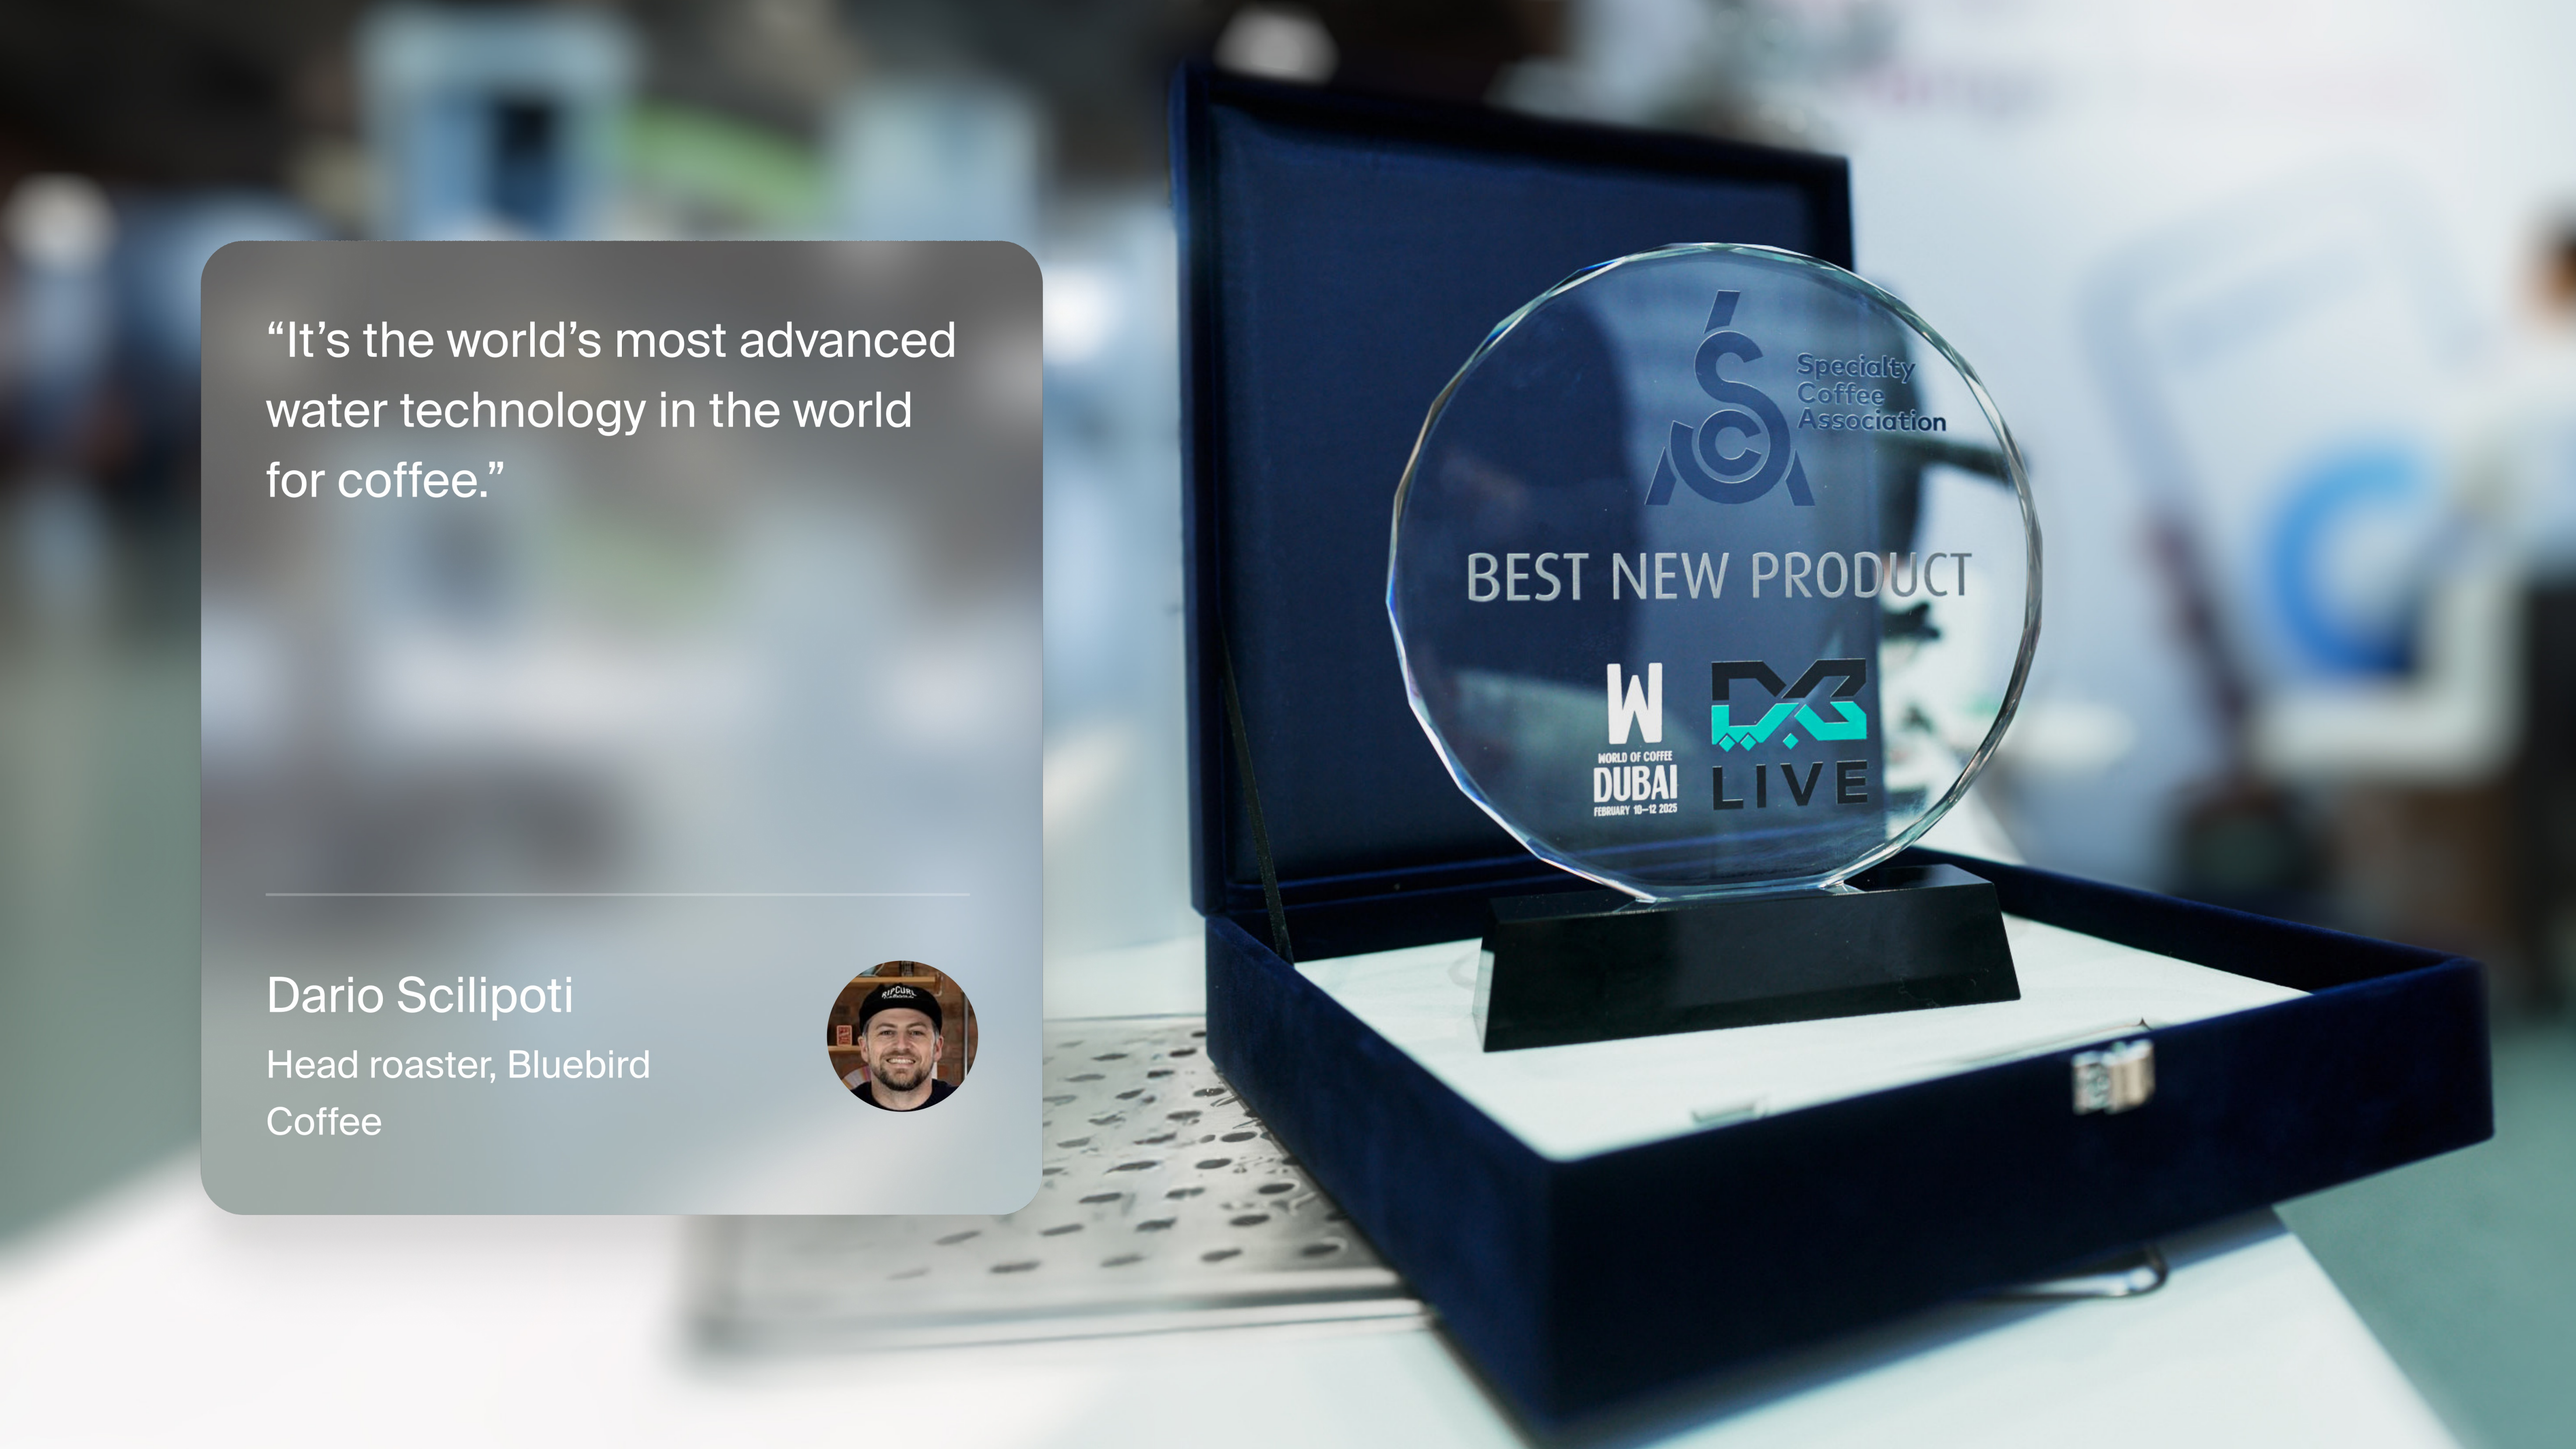

Café Station 1™

98% of coffee is water, and the least controlled ingredient – until now.

“It’s the world’s most advanced water technology in the world for coffee.”

Dario Scilipoti

Head roaster, Bluebird Coffee

Brands using Bluewater

It's like Third Wave but with a swipe on your phone.

Oskar Garberg
Co-owner, Standout Coffee

As a barista, this means I can control flavor extraction with precision— whether I want a light, fruity profile or something bold and sweet. It's a game-changer.

Håkan Sävlind
Co-owner, Pascal

Bluewater's system outperforms others in precision and purity. Other brands I tried mix in tap water, risking recontamination. Zero-water systems with manual mineral addition are inconsistent and time-consuming for my recipes.

Douglas Conde
Owner, Day Trip

Our philosophy is to work with organic products in our café, therefore purification from PFAS is in our interest.

Fredrik Ekman
Owner, Skeppsbro Bageri

Café Station 1™

Covers all your brewing needs with accurate mineral dosing for your delicate coffee beans.

Café Station 1™

Espresso mode

Set and forget. Brew your light-roasted espresso with precision, powered by the steady TDS of mineral extract.

Café Station 1™ – Espresso mode.

Delivers 1.5 mL/L of minerals to both your espresso machine and faucet. Consistent. Streamlined. Built for simplicity.

Café Station 1™

Brew mode

Adjust live. Swipe from 1.5–4.5 mL/L to perfectly match your roast going from light to dark.

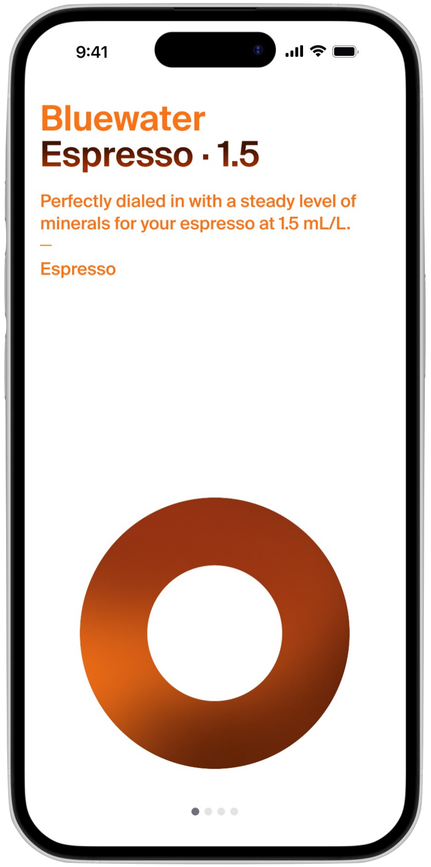

Bluewater Mineralizer – Brew mode.

The faucet gets its own app and setting. Adjust the filtered water separately, with full control to match your brew style and beans.

Espresso mode

Consistent mineral level in your water. Perfect for espresso.
