Bluewater

# Coffee Rock®

New

# Introducing Coffee Rock®. No scale. All flavor.

## Mg > Ca

A magnesium-dominant blend. Improves flavor clarity, fruitiness, and complexity

## Aligned with SCA

Coffee Rock® is backed by science and aligned with SCA recommendations.

## pH for balance

Balanced pH to buffer the natural acidity. Increases the coffee extraction efficiency.

## Crafted by science

Scientifically balanced mineral combination to optimize both the extraction efficiency and mouthfeel.

Coffee Rock®

# No corrosion.
# No limits.

## Ideal pH

The pH level is ideal for equipment protection.

## Zero Chloride

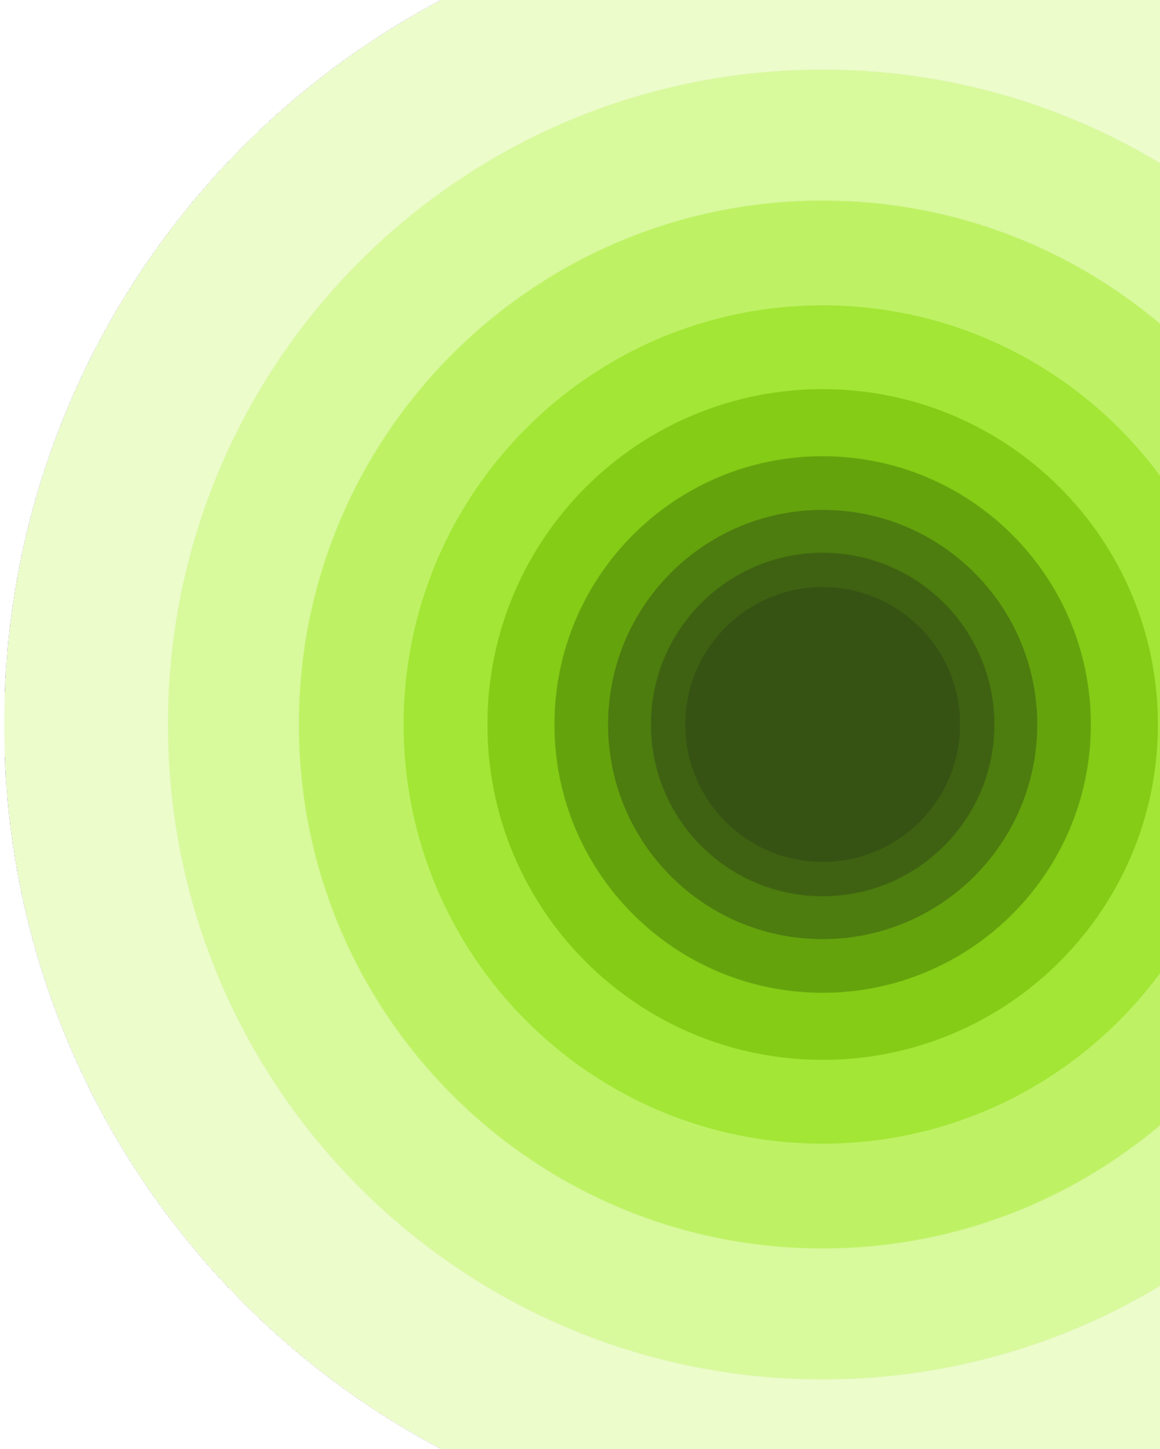

Protects your coffee machine from corrosion.

## Zero-Low scaling

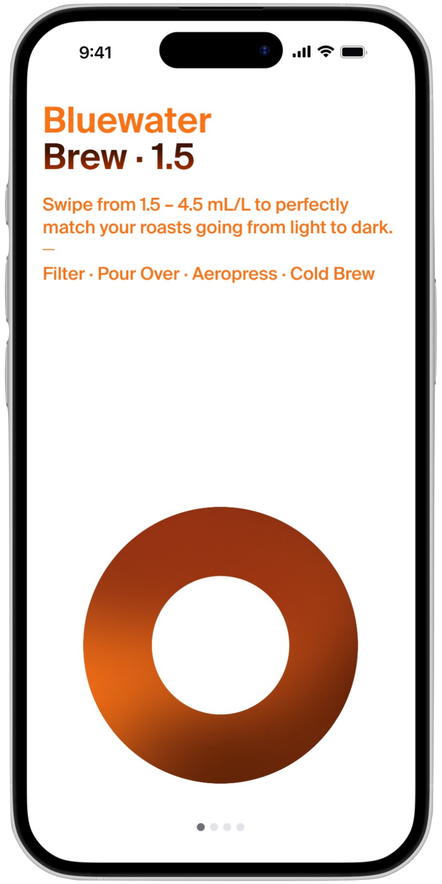

The magnesium-dominant blend reduces machine scaling.

## Controlled TDS

Reduces machine scaling and corrosion problems.

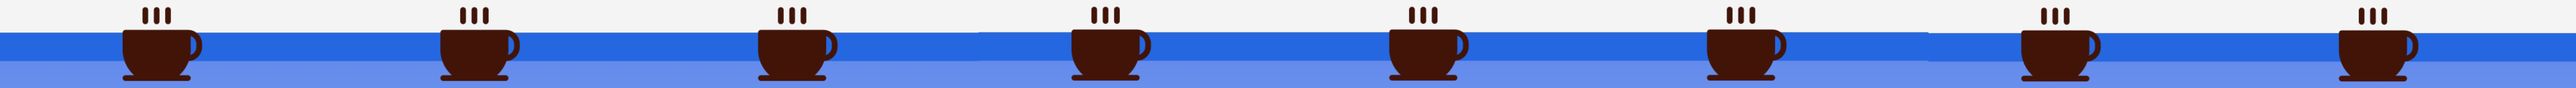

# Bluewater App - Brew Mode

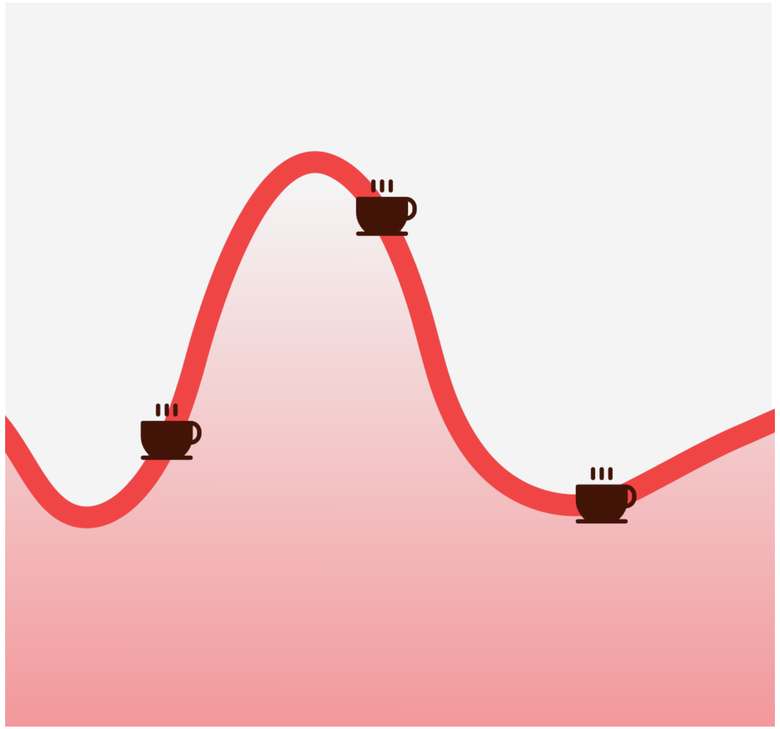

| Coffee Rock® (mL/L) | 1.5 | 2.0 | 2.5 | 3.0 | 3.5 | 4.0 | 4.5 |
|---|---|---|---|---|---|---|---|
| Magnesium (mg/L) | 9 | 12 | 15 | 18 | 21 | 24 | 27 |
| Calcium (mg/L) | 1.4 | 1.9 | 2.4 | 2.8 | 3.3 | 3.8 | 4.3 |

# Precise dosing of minerals.

Our system delivers the highest accuracy and consistency of dosing in the market, simplifying your coffee recipes.

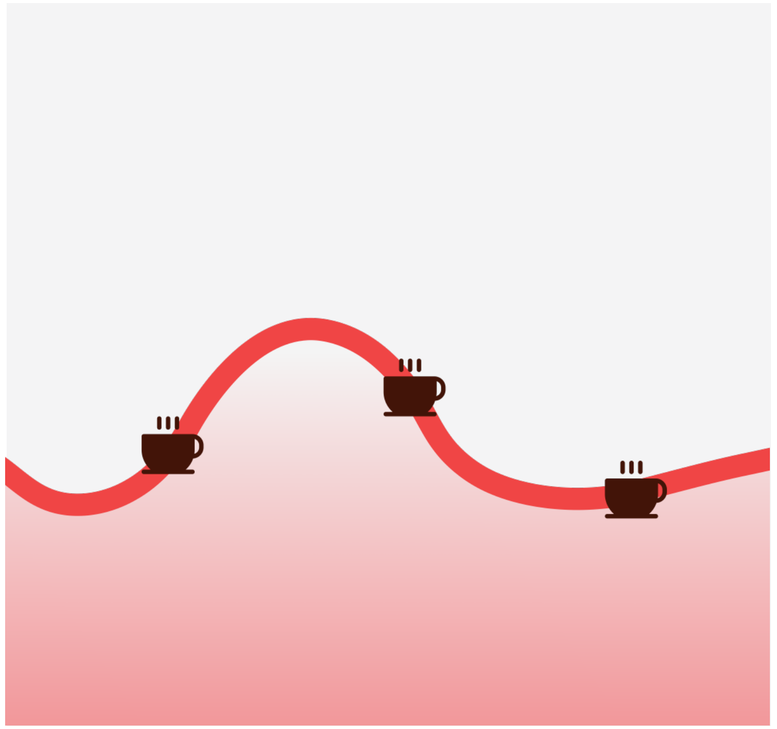

# How we compare.

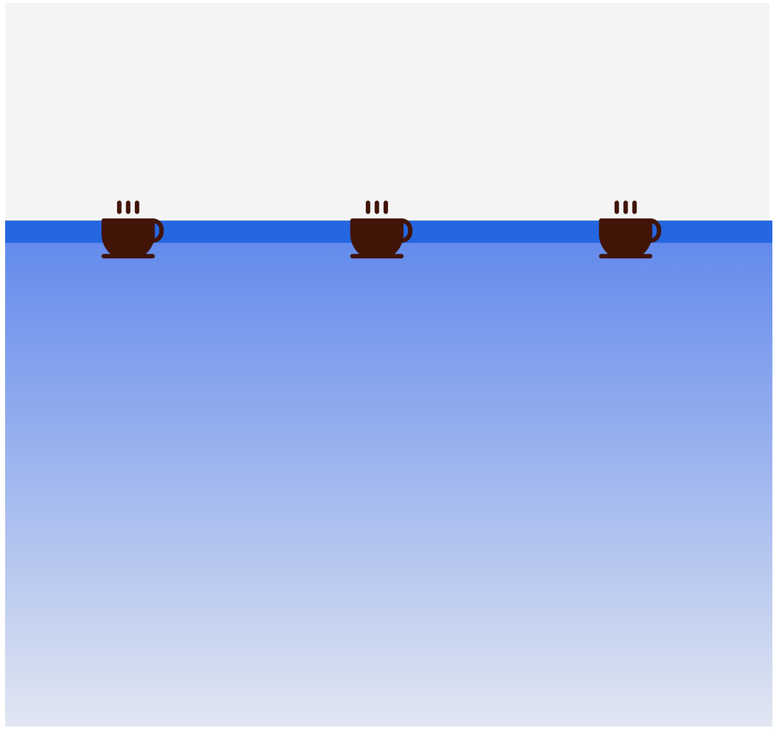

## Standard mineral filters

Soon after installation, mineral levels drop sharply, causing unstable TDS and pH.

## Bypassing

Letting unpurified water back in to boost TDS compromises water quality.

## Bluewater in-line mineralization

Precise adding of liquid minerals. No bypass needed with in-line mineralization.
